YOUR WHOLE COMPANY UNSTOPPABLE, IN FLOW WITH AGENTIC ENGINEERING.

Agentic Engineering for Developers and QA (AE-DEV)

Your engineers have agents, and each uses them their own way. In two days your team learns the mental models under the tools, speaks one language again and works with agents together in its own repository the next morning.

WHO IT IS FOR

Software engineers, QA engineers and analysts, product owners welcome

FORMAT	GROUP	PRICE
Two days, remote or on site	**8 to 12 participants**	**On request**

Quoted by volume and part of your offer, an optional day 3 likewise.

HANDS-ON From the first morning, first in our training codebase, then in your repository	TAILORED In the preparation call, to your team and your stack	LANGUAGE German or English
CERTIFICATE Certificate of attendance	PROCUREMENT AND LEGAL Contract, NDA, DPA and your code	WHO TRAINS IT One of our 70+ trainers, with Stefan Munz and Benedikt Stemmildt accountable

> "We went from 2 engineers playing with agentic coding to 20 using it daily. We created 17 skills and 9 agents available to every engineer."
>
> TOM HIBBERT, CHIEF TECHNOLOGY OFFICER, MOONFARE

WHAT YOUR TEAM TAKES AWAY

- Project rules, agents and skills in your own repository, in use the next morning
- One shared language for working with agents across the team
- The AE-DEV handout for every participant

Mentoring: so the speed reaches your customers

Billed separately by the hour. After the training our mentors stay with your team, embedded in refinements, planning, reviews and retros, while it applies what it learned to real work.

Your team trains with the coding agent it already uses: Claude Code, Codex, GitHub Copilot, Gemini CLI or Cursor. If it has none yet, we bring one that fits your needs.

DAY 1

Foundations

- **Framing:** what agents change about the engineering role
- **How agents work:** tokens, the agent loop, a live demo
- **First hands-on:** everyone works with the agent before lunch
- **Prompting and configuration:** describe intent, set up project memory
- **Security and efficiency:** permissions, context and tokens

DAY 2

Customization and integration

- **Customization:** skills, hooks, subagents, commands in your repository
- **Your own command:** for a task the team repeats
- **Integration:** MCP on real systems, a CLI where faster
- **Spec-driven development:** the spec first, then the agent
- **Wrap-up:** delegate and review, what the team takes along

DAY 3 (OPTIONAL)

Roles

- **One engineering role:** developer, QA and analyst work grow together
- **QA owns the gates:** the quality of the factory over single results
- **Continuous ceremonies:** each keeps its purpose
- **Patterns from hycle:** an assumptions backlog, the daily as agent retro, pairing

GOOD TO KNOW

DAILY HOURS
Usually 9:00 to 17:00, as agreed

LEAD TIME
About four weeks, usually set by your team's calendar

SEVERAL TEAMS
A pilot team first, then team by team in waves of 8 to 12

CANCELLING AND MOVING
Free up to 4 weeks before, then 50%, under 2 weeks 100%. Moving within 8 weeks is free.

YOUR CODE
Stays with you: our trainers never receive, clone or store it.

LICENCES
You provide them, or we bring them and you pay for them.

COMMUNITY
Free for good for every participant

FUNDING
German companies may qualify under the Qualifizierungschancengesetz; we check it with you
