YOUR WHOLE COMPANY UNSTOPPABLE, IN FLOW WITH AGENTIC ENGINEERING.

Agentic Engineering for DevOps and Platform Teams (AE-OPS)

Your team keeps infrastructure, clusters, networks and pipelines running. In two days your platform team hands its toil to agents: plan reviews, provider upgrades, pipeline repairs, drift and incident triage. Every apply stays behind your team's approval.

WHO IT IS FOR

DevOps, SRE and platform engineers who run infrastructure, pipelines and operations

FORMAT
Two days, remote or on site

GROUP
8 to 12 participants

PRICE
On request

Quoted by volume and part of your offer.

PREREQUISITE
Daily work with infrastructure as code, Kubernetes or pipelines, at any level of agent experience

TAILORED
In the preparation call, to your team and your stack

LANGUAGE
German or English

CERTIFICATE
Certificate of attendance

PROCUREMENT AND LEGAL
Contract, NDA and DPA

WHO TRAINS IT
One of our 70+ trainers, with Stefan Munz and Benedikt Stemmildt accountable

YOUR PRODUCTION
The agent plans with read access to shared environments. Applies run only through your pipeline and your approval rules.

> "We went from 2 engineers playing with agentic coding to 20 using it daily. We created 17 skills and 9 agents available to every engineer."
>
> TOM HIBBERT, CHIEF TECHNOLOGY OFFICER, MOONFARE

WHAT YOUR TEAM TAKES AWAY

- Project rules, permissions and a first skill in your infrastructure repository
- A setup in which agent sessions work with read access to shared environments
- A first change from your backlog as a pull request with its plan
- The training handout

DAY 1

Agents on your infrastructure code

- **Framing:** what goes to agents, what stays
- **How agents work:** the agent explains your Terraform
- **Project memory:** environments, state, naming, blocks
- **Blast radius:** apply and destroy blocked, guardrails tested
- **Context:** plans and logs through filters, your CLIs

DAY 2

Your real work, changed safely

- **Skills and hooks:** plan-review skill, chore command
- **Change loop:** a real ticket through to pull request
- **Pipelines and drift:** repair a run, explain drift
- **Incidents:** investigate read-only, a runbook becomes a skill
- **Platform:** what it gives other teams' agents

Your team trains with the coding agent it already uses: Claude Code, Codex, GitHub Copilot, Gemini CLI or Cursor. If it has none yet, we bring one that fits your needs.

Mentoring: so the speed reaches your customers

Billed separately by the hour. After the training our mentors stay with your team while it applies what it learned to real work: from refinement to incident review, as practitioners who have been through the shift themselves.

GOOD TO KNOW

DAILY HOURS
Usually 9:00 to 17:00, as agreed

LEAD TIME
About four weeks, usually set by your team's calendar

SEVERAL TEAMS
A pilot team first, then team by team in waves of 8 to 12

CANCELLING AND MOVING
Free up to 4 weeks before, then 50%, under 2 weeks 100%. Moving within 8 weeks is free.

YOUR CODE
Stays with you: our trainers never receive, clone or store it.

LICENCES
You provide them, or we bring them and you pay for them.

COMMUNITY
Free for good for every participant

FUNDING
German companies may qualify under the Qualifizierungschancengesetz; we check it with you

ABOUT HACKERS&WIZARDS Practitioners with over 20 years of building and running production systems (OTTO, Breuninger, BLUME 2000). Founded in Hamburg by Benedikt Stemmildt and Stefan Munz.
