YOUR WHOLE COMPANY UNSTOPPABLE, IN FLOW WITH AGENTIC ENGINEERING.

Agentic Software Factory: Advanced Team Training (AE-FACTORY)

Everyone on the team uses agents, each their own way. In two days your team turns individual practice into one delivery pipeline everyone runs the same way: more output, reliable results and less stress.

WHO IT IS FOR

Engineering teams already working with coding agents

FORMAT
Two days, remote or on site

GROUP
8 to 12 participants

PRICE
On request

Quoted by volume and part of your offer.

PREREQUISITE
Agentic Engineering for Developers and QA or confident daily work with agents

HANDS-ON
A sandbox pipeline first, then your own candidates

TAILORED
In the preparation call, to your team and your stack

LANGUAGE
German or English

CERTIFICATE
Certificate of attendance

PROCUREMENT AND LEGAL
Contract, NDA, DPA and your code

WHO TRAINS IT
One of our 70+ trainers, with Stefan Munz and Benedikt Stemmildt accountable

WHAT YOUR TEAM TAKES AWAY

- A first delivery pipeline the whole team runs the same way, built from parts it can inspect: skills, subagents, state and contracts
- The AE-FACTORY handout

Mentoring: the pipeline grows with real work

Billed separately by the hour. After the training our mentors stay with your team while the pipeline takes on more real work and the gates get stricter. Every manual correction becomes a rule the pipeline keeps.

DAY 1

Start the factory small and observable

- **Factory framing:** from individual use to a team pipeline
- **State and planning:** spec and issue as the stations' contract
- **The smallest pipeline:** planner, refine, implement in a sandbox
- **Observability:** time, token cost, failures and retries per step
- **Challenge before code:** an adversarial review of the plan

DAY 2

Review, gates and your own candidates

- **Review and rework:** a review loop that escalates to a person
- **QA and codify:** QA as the gate, every delivery sharpens the rules
- **Orchestration:** sequence stations, bound loops, keep state
- **Your own candidates:** real backlog work through the factory
- **Share-out:** show progress, plan the next sprint

Your team trains with the coding agent it already uses: Claude Code, Codex, GitHub Copilot, Gemini CLI or Cursor. If it has none yet, we bring one that fits your needs.

GOOD TO KNOW

DAILY HOURS
Usually 9:00 to 17:00, as agreed

LEAD TIME
About four weeks, usually set by your team's calendar

SEVERAL TEAMS
A pilot team first, then team by team in waves of 8 to 12

CANCELLING AND MOVING
Free up to 4 weeks before, then 50%, under 2 weeks 100%. Moving within 8 weeks is free.

YOUR CODE
Stays with you: our trainers never receive, clone or store it.

LICENCES
You provide them, or we bring them and you pay for them.

COMMUNITY
Free for good for every participant

FUNDING
German companies may qualify under the Qualifizierungschancengesetz; we check it with you

> "We went from 2 engineers playing with agentic coding to 20 using it daily. We created 17 skills and 9 agents available to every engineer."
>
> TOM HIBBERT, CHIEF TECHNOLOGY OFFICER, MOONFARE

ABOUT HACKERS&WIZARDS Practitioners with over 20 years of building and running production systems (OTTO, Breuninger, BLUME 2000). Founded in Hamburg by Benedikt Stemmildt and Stefan Munz.
